CAN BE APPLIED BY AIRCRAFT AT RATES AS LOW AS 5 LBS. PER 2 GALS. OF WATER, PER ACRE.

TOMATOES, PEPPERS, CUCUMBERS, MELONS AND SQUASH: Use at the rate of 5 to 10 lbs. per acre. First application should be made when the plants are 3 to 4 weeks old. Repeat at 7 to 10 day intervals. Apply 5 to 7 applications per season for best results.

POTATOES: Use at the rate of 5 to 10 lbs. per acre. NUTRI-LEAF improves foliage color as well as tuber development even when soil conditions are unfavorable. Potatoes set 71% of their tubers between the 70th day and the 100th day after planting. NUTRI LEAF helps carry the plant through adverse soil and temperature conditions which may occur during this critical period. Suggest applying when plants are young and continue at 7 to 10 day intervals, as needed, particularly through the 30 day tuber setting period.

CELERY, LETTUCE, ENDIVE, BROCCOLI, CABBAGE, CAULIFLOWER, BRUSSELS SPROUTS, KALE AND SPINACH: Use NUTRI-LEAF as a starter solution at the rate of 5 lbs. per 100 gals. of water at time of transplanting. For use as a foliar, nutritional spray, apply at the rate of 5 to 10 lbs. per acre when the plants have been established for approximately 3 weeks. Use 5 to 6 sprays per season at 7 to 10 day intervals, depending on weather conditions and crop vigor.

CARROTS, PARSLEY, ASPARAGUS: Foliage efficiently uses high concentration of nutritional sprays. Apply at the rate of 10 to 15 lbs. per acre. Frequency of application depends on prevailing weather conditions and amount of growth desired.

BEANS, PEAS, SWEET CORN, LENTILS AND ONIONS: Use at the rate of 5 to 10 lbs. per acre when plants are 3 to 4 weeks old. Repeat applications at 7 to 10 day intervals or as needed.

LAWNS, GOLF COURSES AND TURF AREAS: For Kentucky and Merion Blue, Bent, Bermuda and Zoysia Grasses.

The type of grass, color and rate of growth will dictate rate and frequency of application. NUTRI-LEAF can be combined with fungicide and/or soil insect treatments. (See Compatibility for the addition of Insecticides and Fungicides.) **NOTE:** Grasses growing in shade require approximately one-half as much plant food as when grown in full sun.

Use 5 lbs. in 100 gallons of water per 5,000 sq. ft., or 1 lb. in 10 gallons of water per 1,000 sq. ft., or 15 level tablespoonsful in 4 gallons of water per 400 sq. ft. Apply monthly, starting February or March. More frequent applications may be necessary for desirable color and growth, especially on Bermuda and Zoysia grasses. Apply with watering can, hose proportioner or sprayer.

WHEAT, BARLEY, OATS, RYE, RICE, SUNFLOWER, AND SUGARCANE: Apply at the rate of 5 to 10 lbs. per acre throughout the growing season, whenever it is necessary to stimulate growth and improve plant vigor. On small grains, applications at early tillering and when 10% of the heads are visible, are most beneficial.

SHADE TREES AND SHRUBS: Use at the rate of 5 to 10 lbs. per 100 gals. of water or per acre. Apply early in the growing season and whenever supplemental feeding is necessary to improve plant vigor and appearance.

NURSERY AND GREENHOUSE: Use at the rate of 5 to 10 lbs. per 100 gals. of water or per acre on plants, flowers, shrubs and trees for direct spray to foliage and for transplanting work. For preparing transplant slurry, add ¼ lb., or ½ standard cupful, NUTRI-LEAF per 3 gallon bucket of puddled soil.

NOTE: In a sprinkler system, use 1¾ lbs. per 100 gallons or more of water every 2-3 weeks, or ½ lb. per 100 gallons of water 2-3 times a week per 400 sq. ft. of area.

CATTLEYA ORCHIDS: For liquid feeding of Cattleya Orchid in white fir, use the following rates in place of watering every 7 to 10 days.

	Per 100 Gals of Water	
	Gms.	Oz.
Nutri-Leaf	50	1¾

	For Hozon (Siphon) Application		
	Gms.	Oz.	Tbsps.
Nutri-Leaf	21	¾	1¾
plus			
Ammonium Nitrate	56	2	3½-4

Amount to be dissolved in 3 gals. of water to make 45 gals. liquid fertilizer through Siphon.

HOUSE PLANTS: African Violets, Philodendron, Geraniums, Gardenia, Coleus. Mix 1 standard level teaspoonful in 1 quart of water. Spray on foliage or apply as a drench to soil twice monthly. For African Violet Culture: Apply as a drench to soil only.

HYDROPONIC CULTURES: Each 2 ozs. of NUTRI-LEAF per each 100 gallons of water yields a nutrient solution containing 30 ppm of each of the major nutrients. For specific crop recommendations, consult your State Horticultural Experiment Station.

The use of this material being beyond our control and involving elements of risk, may produce plant injury; we do not make any warranty, express or implied, as to the effects of such use, when this product is not used in accordance with the directions as stated on this label.

General Information

Tee Time 12-30-7 with Siduron is a combination of the proper nutrients to use on newly seeded turf or on established turf where overseeding and a pre-emergence herbicide is required. The high phosphorus content provides the nutrient most needed for seedling development and at the same time, will supply enough nitrogen and potash for initial plant growth. At the recommended rates, this product will control annual weed-grasses such as crabgrass, foxtail and barnyard grass in newly seeded bluegrass, perennial ryegrass and fescue lawns.

When And How To Use

Apply to turf in the spring, prior to expected annual weed grass seed germination. Apply 3.3 pounds per 1,000 square feet in newly seeded areas as the last step before watering. For established turf, apply at 6.6 pounds per 1,000 square feet. At least one-half inch of water must be provided within three days of treatment.

This product is hazardous and should be kept out of the reach of children. Consult the bag label for detailed use and precautionary information.

"Article VIII, *Appointment and Authority Assistant secretaries, and Attorney-in-Fact and Agents to accept Legal Process and Make Appearances.*

Section 30, *Appointment.* The Chairman of the Board of Directors, the President, any Vice-President or any other person authorized by the Board of Directors, the Chairman of the Board of Directors, the President or any Vice-President, may, from time to time, appoint Resident Assistant Secretaries and Attorneys-in-Fact to represent and act for and on behalf of the Corporation and Agents to accept legal process and make appearances for and on behalf of the Corporation.

Section 31, *Authority.* The Authority of such Resident Assistant Secretaries, Attorneys-in-Fact, and Agents shall be as prescribed in the instrument evidencing their appointment, and any such appointment and all authority granted thereby may be revoked at any time by the Board of Directors or by any person empowered to make such appointment."

This power of attorney is signed and sealed under and by the authority of the following Resolution adopted by the Board of Directors of THE AMERICAN INSURANCE COMPANY at a meeting duly called and held on the 28th day of September, 1966, and said Resolution has not been amended or repealed:

"RESOLVED, that the signature of any Vice-President, Assistant Secretary, and Resident Assistant Secretary of this Corporation, and the seal of this Corporation may be affixed or printed on any power of attorney, on any revocation of any power of attorney, or on any certificate relating thereto, by facsimile, and any power of attorney, any revocation of any power of attorney, or certificate bearing such facsimile signature or facsimile seal shall be valid and binding upon the Corporation."

IN WITNESS WHEREOF, THE AMERICAN INSURANCE COMPANY has caused these presents to be signed by its Vice-President, and its corporate seal to be hereunto affixed this 29th day of April 19 85.
